Dalby's best kept secret - a 554 person village with all the comforts of home.

Servicing the Darling Downs region, the latest Stayover village is conveniently located near the heart of Dalby. Hidden from the road making it quiet and private, this 552 person village is Dalby's best kept secret.

Ausco Modular has responded to growing demand from companies in the region to build more accommodation for employees following the success of its two Chinchilla Stayover villages.

The Stayover Dalby Village is designed to provide convenient, comfortable and serviced accommodation for workers of the mining and resource companies operating in the region.

Customer feedback revealed that traditional expectations of site accommodation is changing and people are looking for an atmosphere where they can relax and reinvigorate after a hard day's work. This is the central concept by which Stayover Dalby was designed, creating a 'home away from home' for employees working remotely for short or long-term periods.

Stayover Dalby Village offers guests access to multiple recreational and functional facilities such as a gym, barbeque areas, pool tables, table tennis tables, and flat screen televisions in every room.

All guests enjoy an ensuited room, breakfast, crib and dinner, made fresh in the village's restaurant and designated storage areas for equipment and vehicles.

Stayover Dalby Village presents exceptional value for money with a vast array of services and facilities at an inexpensive rate.
