Darwin's first purpose built managed accommodation village will provide the Northern Territory with essential accommodation infrastructure to support the oil and gas boom.

Stayover in Darwin is the latest edition to Ausco Modular's growing network of accommodation villages.

In August 2012, Ausco Modular was awarded development rights by the Northern Territory Government to construct a short-stay accommodation village and a 'home away from home' for 304 employees and contractors working in the mining and resources industry.

Ausco Modular's Stayover villages offer accommodation and lifestyle luxuries to enhance the quality of life for workers.

Based on the design of leading hotels, Stayover in Darwin offers private en-suited accommodation and a range of social areas to relax and unwind.

Ausco Modular's Stayover villages also offer impressive sport and recreation facilities, including gyms with state-of-the-art cardio and weights equipment, encouraging an active and healthy lifestyle for guests.

Designed to provide comfortable, serviced accommodation to workers within the region, this purpose-built facility will bring the ultimate in village living to Northern Territory worker accommodation.

In addition to high-quality guest services, Ausco Modular's Stayover villages feature modern kitchens and large dining facilities. Lavish landscaping with native plants and winding pathways create a relaxing living environment for guests.

A vegetable and herb garden grown on site encompasses the healthy lifestyle Stayover by Ausco promotes throughout all their villages.

Ausco Modular brings its extensive experience in designing, constructing and managing remote villages to developing this vibrant and attractive community.

Ausco Modular brings the latest accommodation to the Northern Territory to solve an urgent need for housing.
